

Subj: TECHNICAL EVALUATION BOARD REPORT FOR N00604-08-R-0001, RANGE AND BASE OPERATING SERVICES, PACIFIC MISSILE RANGE FACILITY, BARKING SANDS, KAUAI

5. The following offerors submitted proposals prior to the deadline of 2:00 pm HST, 15 February 2008.

6. Each proposal was evaluated for each Factor A, Technical, weighted with Subfactors 1-4 in accordance with the criteria set forth in references (a) and (c). Each proposal was reviewed by the Technical Evaluation Team (TET) to identify those criteria items that were exceptional, acceptable, questionable, and unacceptable. All narrative justifications of the exceptional, unacceptable, and questionable criteria by offeror were provided to the Technical Evaluation Board (TEB) to support the weighted scores associated with each Annex. The TET Evaluators presented a narrative summary to support the weighted ranking produced by the TF! Software and discussed extenuating circumstances when there were noteworthy issues. The TEB discussed and validated each member's evaluation findings. Following is a chart generated from the TET evaluation inputs into the TF! Software, illustrating the weighted ranking within each level of importance Group by Annex. These are followed by supporting narratives on each offeror's proposal which summarize the significant items obtained from the evaluation of the individual criteria per annex.
